**PAARA POLICIES**

Membership in PAARA is \$6.00 per calender year (payable in Jan), which includes a subscription to Paaragraphs. Make payment to :PAARA, P.O. Box 911, Menlo Park, Ca. 94026

Sorry, Bill, I goofed last month and left you out, so this ought to make up for it -- Andy.

Feb program -- Feb 1, 1985 7 30 PM

Menlo Park Rec Center

## Image Communications with the Apple II Computer

Howard Nurse WD6A , (ex W6LLO)

Howard will demonstrate his company's product

"PHOTOCASTER" , used for slow-scan tv

Herb, W6SAW, reports that he has a Kenwood TR-7850 2 meter FM transceiver, 40 watts, in perfect condition, never used mobile available available for sale. He also has a 12 volt DC supply and isopole antenna. He is asking \$195, and can be reached at 415-364-8538

To: All Packet Stations

Jeff Sue, WA6SLF, and Dave Pope, K6JKQ, both located in Stockton, CA, report success in linking into the Bay Area using a new high-level repeater put up by Rob Taylor, KA6NAN.

The new machine, KA6NAN-1, is located 2400' high in the foothills overlooking the city of Palo Alto, CA. The hardware in use is the GLB controller. At this elevation the KA6NAN repeater becomes the highest level repeater serving the Bay Area packet user community, and will undoubtedly bring packet access to some of the other major cities which are neighbors to San Francisco.

## Presidents Corner

I would like to encourage all of the members to remember the Monday night net, 147.45 MHz at 8:30 pm local time. This is where you can learn the latest of what is happening in PAARA, and can become a more active part of it all. Checkins and activity on the net have been rather low, and I am sure the regulars would love to hear some new voices.

I look forward to seeing all of you at the next meeting.

## Contest Corner

January brought us the January VHF sweepstakes, which had a major rule change this year that made it almost the same as the September VHF QSO Party. The big difference was that it was a LOT colder on the mountain.

Regardless of the temperature, Bob Gallagher, *K80IRT*, and Alan Larson *W6BAZP*, joined a team to operate *NU6S* on a mountain south of San Jose. They definitely appreciated hearing from those PAARA members who were able to give them a call over the weekend. I am sure that a good time was had by all.

This February will include the North American Sprint, which Tom Schiller, *N6BT*, described in his talk to PAARA a couple of years ago. The CW version will be February 2nd, with Phone a week later on February 9th. The rules may be a bit hard to find, I found a copy on page 88 of the January 1984 (last year's) QST. It runs for just four hours, so it won't be a major disaster in the schedule. It also includes a special QSY rule, so read the rules carefully.

## 220-MHz DIGIPEATERS

Scott Miles, *WB6PQM*, is establishing two new 220-MHz digipeaters in the San Francisco Bay area. The new simplex machines will be running on 223.58 MHz, and are intended to serve the needs of RACES in Contra Costa county. The digipeaters will be based on GLB PK-1 TNCs.

Rich Collins, *NT6U*, reports that he and David Bly, *WD6EUM*, have installed a digipeater on 220.58 MHz in San Leandro, CA. This site, made available by the Alameda County RACES group, provides good coverage of the Bay area.

Via K86M.

# QUEMENT ELECTRONICS

1000 SO. BASCOM, SAN JOSE

## NEW MFJ VERSALOAD MFJ KW DUMMY LOAD

Lets you tune up fast into 50 ohm resistive load. Extend life of finals. Reduce QRM. Includes transformer oil. 1 KW CW, 2 KW PEP for 10 minutes. Low VSWR to 400 MHZ.

Includes high quality transformer oil.  
Low VSWR to 400 MHZ.  
1 KW CW, 2 KW PEP.

**\$34<sup>95</sup>**

New MFJ-250 VERSALOAD kilowatt dummy load lets you tune up fast. Extends life of transmitter finals. Reduces on-the-air QRM.

Runs 1 KW CW or 2 KW PEP for 10 minutes, 1/2 KW CW or 1 KW PEP for 20 minutes. Continuous duty with 200 watts CW or 400 watts PEP. Complete with derating curve.

Quality 50 ohm non-inductive resistor. Oil cooled. Includes high quality, industrial grade transformer oil (contains NO PCB).

Low VSWR to 400 MHZ: Under 1.2:1, 0-30 MHZ. 1.5:1, 30-300 MHZ. 2:1, 300-400 MHZ. Ideal for testing HF and VHF transmitters.

50-238 coax connector. Vented for safety. Removable vent cap. Has carrying handle. 7-1/2 inches high, 6-5/8 inches diameter.

Order from MFJ and try it — no obligation. If not delighted, return it within 30 days for refund (less shipping). One year unconditional guarantee.

Order today. Call TOLL FREE 800-647-1800. Charge VISA, MC or mail check, money order for \$34.95 plus \$4.00 shipping for MFJ-250.

Don't wait, tune up fast and save those finals and reduce on the air QRM, order today.

**CALL TOLL FREE 800-647-1800**

Call 601-323-5869 for technical information, order/repair status. Also call 601-323-5869 outside continental USA and in Mississippi.

**MFJ ENTERPRISES, INC.**  
BOX 484, MISSISSIPPI STATE, MS 39762

### FEATURES:

- Compact Size
- Built-in Receive Preamp
- All-mode SSB FM and CW
- Complete Front Panel Switching
- Automatic Antenna Changeover
- 2 Watts In—30 Watts Out

### SPECIFICATIONS:

Frequency Range	144 to 148 MHz
RF Power In	200 mw to 5 Watts
RF Power Out	30 Watts (2 in-30 out)
Modes	SSB FM and CW
Receive Preamp	10 db gain min. 20 db - 5 db noise figure
DC Power	13.6 VDC 5 Amps
Size—Weight	3 1/2" x 2" x 7"; 1 1/4 Lbs
Warranty	5 years (1 year RF Power Trans.)

## B23A — 2 Meter Amplifier 2W IN — 30W OUT
